## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-4 are rejected under 35 U.S.C. 102(a) as being anticipated by Matsumoto, et al. (JP02001208089A).

Matsumoto discloses an impact absorbing steering column apparatus having low friction material treatment is effected on one or both of slide surfaces of fitting portions of an upper column 2 and a lower column 1 of a steering column (see paragraph [0022]). The steering column, inherently, is electric. The steering column is telescopic. The steering column has a sleeve that is subjected to a low friction material treatment.

### ***Allowable Subject Matter***

3. Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

4. Applicant's arguments filed June 28, 2007 have been fully considered but they are not persuasive. With respect to the applicant arguments, the independent claims are Jepson-type claims (see MPEP 2129, III) therefore the examiner has examined the *improvement* the applicant has set forth. Further, the prior art clearly discloses the claimed structure.
